

Click™ Portal for Clinical Trials

Configurable Software to Manage Trial Budgeting and Billing

Automate your clinical trial budgeting and billing processes with Huron's Click™ Portal for Clinical Trials. As a comprehensive clinical trials management system (CTMS), the software streamlines the major clinical trial business processes. The Click CTMS facilitates participant enrollment and visit scheduling, ensures accurate billing of research charges, promotes timely sponsor billing and collections, improves budgeting and contracting, and reduces the risk of noncompliance with regulatory guidelines.

Built on an open extensible architecture, the Click CTMS integrates with other key research and hospital systems such as Institutional Review Board (IRB) and Electronic Medical Record (EMR) systems. Tight external system integration eliminates duplicate data entry while ensuring that study sponsors, Medicare, and other payers are billed appropriately. The Click CTMS also leverages clinical system charge master data coming from existing systems, further improving productivity.

Only Click™ Portal

- Provides a comprehensive platform for administrative, compliance, and financial processes throughout the clinical trial lifecycle
- Offers a customer configurable development environment enabling easy integration of study data with other research business and compliance processes
- Enables sharing best practices via the industry's most active user group
